

Arlene Critzos, ASID | Catherine Belkov

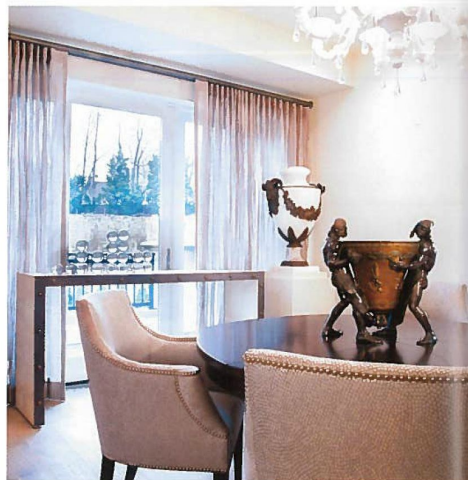

Founded in 1979, Interior Concepts creates a broad spectrum of projects, from well-appointed family homes, beach houses and mountain retreats to large flats and estates in some of the world's most prestigious locales. The principals emphasize creativity and professionalism, never beginning a project without fully understanding a client's needs, financial scope, expectations and timing. Their shared goal is not only to meet their clients' expectations, but to exceed them.

Arlene Critzos and Cathy Belkov have been creating beautiful interiors together for 30 years. Critzos's European studies, travels and multiple decorative arts degrees, coupled with Belkov's background in fine arts and art history, enable the duo and their entire team to work in multiple artistic paths, creating projects in a wide array of styles. The designers and their associates take great pride and pleasure in creating what they believe to be the most valuable facet of a person's life—their environment. As the design pros embark on new projects, it is their goal to work collaboratively with clients to create homes that are truly unique and a haven for them.

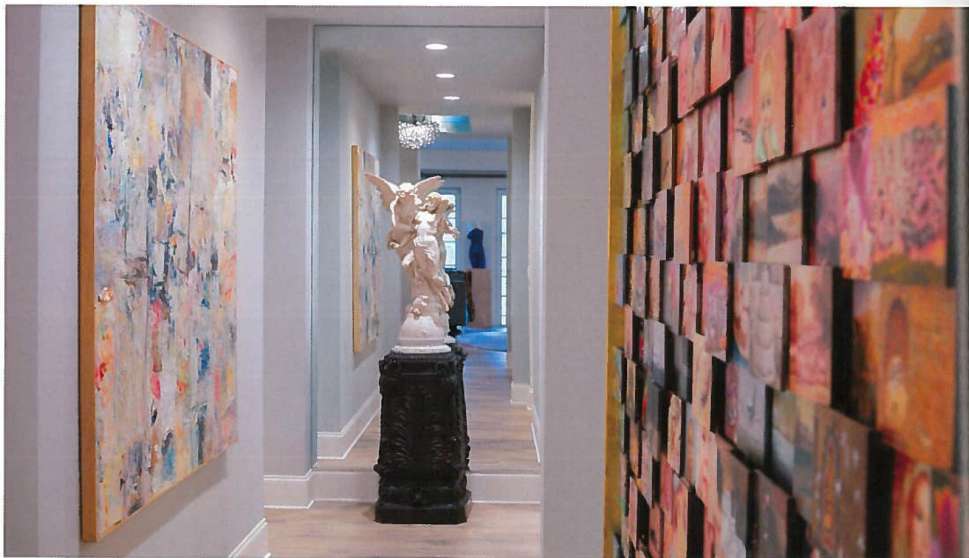

The firm, Interior Concepts, has recently been featured in *Home & Design, Annapolis Home, Portfolio: Top 100 Designers, Tuscan Style* and *Build Maryland*.
