My Favorite Room

Three award-winning interior designers share their personal favorite spaces.

ARLENE CRITZOS

“

I love this beautiful European Great Room because it encapsulates so much feeling and so many functions at once, due to its scale. Four separate areas (two are shown) bring multiple living functions together—television watching, conversational seating, music (piano) and game playing. Two unique matching English cabinets that stand 12' tall add stature to the room. The fireplace is European walnut and was purchased in England and refurbished. All ceilings are two-story with detailed plaster panels which further enhance the ceiling vistas.”
